

CYBERSECURITY at CEDARVILLE UNIVERSITY

What is cybersecurity?

Cybersecurity is about protecting and respecting the rights of every individual and organization in cyberspace. From technical areas like cyber operations to non-technical disciplines like cyber law & ethics, many fields demand cybersecurity. With today's prevalence of hackers, cybersecurity is critical to our national welfare.

Why cyber?

According to the National Institute of Standards and Technology (NIST), the shortage of cybersecurity professionals is estimated to be 2.72 million globally. In 2022, there were about 590,000 cybersecurity job openings in the United States alone, and the demand for cyber experts will only increase. In Ohio, the average annual salary for cybersecurity jobs in general is over \$100,000. Now is a better time than ever before to start preparing for a high demand, high paying cyber career.

Why Cedarville Cyber?

Everything we do here is for the Word of God and the Testimony of Jesus Christ. Our cyber program at Cedarville is one of only 2 academies in the nation to be recognized by the National Security Agency as a National Center of Academic Excellence in both Cyber Operations and Cyber Defense and hold Cybersecurity accreditation from the Accreditation Board for Engineering and Technology (ABET). If you desire technical excellence with Christian faith, then Cedarville is for you.

Anything else?

Outside of our nationally renown curriculum, our students dominate in numerous cyber exercises from the Collegiate Cyber Defense Competition (CCDC) to the National Cyber League (NCL), consistently ranking in the upper echelons nationally. When not competing, students hear from some of the most insightful minds in industry and government.
